

# AKHIL A

Python Full Stack Web Developer

I am a highly motivated and adaptable individual with a passion for technology and a strong background in software development. With expertise in both front-end and back-end technologies, I thrive in dynamic environments where I can leverage my skills to tackle complex challenges and drive innovation. My commitment to continuous learning and staying updated on industry trends allows me to remain at the forefront of technology advancements. I am a collaborative team player with excellent communication skills, able to effectively contribute to and lead projects while fostering a positive and inclusive work environment. With a keen eye for detail and a proactive approach to problem-solving, I am dedicated to delivering high-quality solutions that meet and exceed expectations. Eager Python Django developer with 9 months exploiting model-template-view architectural pattern of Django framework to shorten development times and reduce design costs. Specializes in creating accessible, data-driven web assets. Keen to apply expansive development knowledge to deliver fast, efficient Billing projects.

 **Address**  
Aneezham(h),  
Vaikathoor, Valanchery(po),  
Malappuram, Kerala,  
pin:-676552

## Education

2021-2023  
**Masters In Computer Application**  
Amrita University

2018-2021  
**Bachelor's in Computer Application**  
Amrita University

## Skills

C programming

C++

CSS

Bootstrap

HTML

JavaScript

AJAX implementation

Python Django

Git Version Control

SQL Proficiency

Database Management

## Language

English

Malayalam

## Experience

- Worked independently to design, develop and test code.
- Designed responsive user interfaces with HTML, CSS, and JavaScript for optimal viewing on various devices.
- Built reusable templates with Django's template engine to simplify complex UI designs while maintaining consistency across pages.
- Mentored junior developers by sharing knowledge of Python and Django best practices, fostering a positive team environment.
- Applied change control best practices for software enhancements to minimize end-user disruptions.
- Monitored and maintained operational readiness of middleware applications.
- Stayed current on developments in related Python frameworks.

## Projects

Hospital Management System November 2023- December 2023 Live URL

- Developed a web-based hospital management system using Python, HTML, CSS, and JavaScript.
- Implemented user-friendly interfaces for administrators, medical staff, and patients, reducing administrative workload by 35%
- Automated appointment scheduling and patient record management, leading to a 40% increase in operational efficiency.
- Integrated a secure login system with role-based access control to ensure data privacy.
